

Academic Progressions in British Education Centre at Al Faraheedi Schools and potentially at the Iraqi International University for Science & Technology

The BEC Qualifications are based on the National Qualifications Framework (NQF) in the United Kingdom

The above diagramme is based on the National Qualification Framework in UK, as last revised and applied from 1st September 2004. All study programmes to be delivered by BEC at Al-Farheedi Schools and potentially at the IIUST across Iraq will in the first instance comply with the strict criteria and recommendations of a UK based Examination Board (tbc)

In addition to securing a highly recognised UK vocational/academic certificate at the end of each academic year at BEC and at the IIUST, students will also receive awards from the IETP and/or from relevant colleges/universities in the UK. These offer students unprecedented options for academic achievements and professional career progressions.

BEC and the IIUST will work towards maintaining the status of an approved Examination Centre in Iraq and will closely be monitored by the IETP and Hackney Community College, who will be responsible for the internal verification and supervision of all aspects of Academic Provisions, Assessors Training , Study Schemes, Student s' Portfolio of Achievements and the Awarding procedures.
