# Welcome to West Kent College and the British Education Centre

West Kent College across the county of Kent and abroad.

"I would like to offer you a warm welcome to West Kent College and our Course Guide for Higher Education courses in 2009/10"-

We are proud to be seen as the local University', providing progression opportunities from our Further Education courses as well as the opportunities to gain Higher Education qualifications. The College has been offering Higher Education courses for over 15 years in partnership with the university of Greenwich and, in recent years, the University of Kent, from our purpose built University Centre in Brook Street, Tonbridge.

.... our growing reputation has allowed us to expand the range of courses we offer, alongside the traditional Higher National Diploma and Honours Degree programmes, we now offer a wide range of Foundation Degrees, the vocational route to a degree in many subject areas.

There are exciting times ahead, with the multi million pound re-development of the Brook Street campus which is well under way and the potential merger with South Kent college. Delivering high quality programmes to our students without disruptions is our priority.

More information about the re-development (Campus 21) can be found on our website [www.wkc.ac.uk](http://www.wkc.ac.uk) .....

The British Education Centre (BEC) is a member of the International Education & Training Partnership (IETP) and works in partnership with West Kent College's departments of International Recruitment, Higher Education and Vocational Centres.

BEC has the sole responsibility of representing, developing and delivering West Kent College's higher education and vocational studies across the Middle East and North Africa, hence aims to increase international students access to academic studies both in the UK and at various international locations within designated BEC institutes abroad, visit: [www.britisheducationcentre.co.uk](http://www.britisheducationcentre.co.uk)

BEC works with highly recognised education providers, public sector leaders, local employers and dedicated investors in many countries. Our aim is to promote access to quality education for all adults seeking betterment and to create options for meeting the regeneration needs of modern businesses, local communities and progressive Governments.
